

Don Skerrett

Mr. Don Skerrett is a seasoned business leader with a visionary, entrepreneurial spirit. He is the Managing Partner of *Corporate Development Advisors*, a life sciences investment and business management practice that is developing a Title II crowd-funding portal, *Podfundr.com*. The portal's deep-bench due diligence process mitigates risk for accredited life science investors by placing pre-vetted, investment-grade assets in strategically diversified "investment pods", which are then funded by the crowd. PodFunder helps successful acquisition candidates find suitable exits through its relationship with investment banking groups that place the assets in small-to-midsize operating companies. Mr. Skerrett also serves as Chairman and CEO of *NanoScan Imaging*, an early-stage diagnostics company whose lead technology gives physicians a new way to image cardiovascular disease and metastatic cancers. Don is also Chairman and President of the *Pharmaceutical Consulting Consortium International (PCCI)*, an established mentoring and networking group, which has helped more than 100 life science start-ups over the past 10 years. He has founded and run several early-stage companies. His career spans pharmaceutical and consumer advertising, media promotion, magazine publishing, market research, management consulting and corporate acquisitions.
